

Home Monitor Quick Start

Set up

1. Read the complete IFU.
2. Install the supplied batteries.
3. Place the monitor on a stable surface.
4. Select the approved user profile.

Use

1. Prepare according to the clinician and device instructions.
2. Apply the fictional cuff on bare skin.
3. Sit supported and remain still.
4. Press Start and wait for the display.

Clean and store

Wipe only as the complete IFU allows. Do not immerse. Store dry with the cuff uncompressed.

Error message

An error code is not a diagnosis. Check the complete IFU and contact the approved support route if it continues.

Fictional device. This quick start does not replace approved labeling, training, or clinical advice.
