

Home Sample Kit: Quick Instructions

Before you begin

- Confirm the kit name and expiration date.
- Read the complete printed instructions.
- Wash and dry your hands.
- Do not use a damaged or incomplete kit.

Collect

1. Write the fictional collection date and time on the demo label.
2. Use only the supplied collector.
3. Place the sample in the labeled tube without touching the inside.
4. Close the cap firmly.

Pack and return

1. Place the tube in the specimen bag.
2. Place the bag and absorbent sheet in the return box.
3. Use the prepaid mailer before the fictional cutoff shown in your instructions.

Stop and get help

If the kit is damaged, expired, missing parts, or the printed instruction differs from this demonstration, stop and use the manufacturer support route on the real kit.

Fictional demonstration—not instructions for any real specimen, test, patient, or laboratory.
